

PRESIDENT WASHINGTON

Directions: Students are given a list of coordinate points to plot. They should connect the points only within the designated zones. When they are done, they will have graphed a copy of the above picture.

Here are some tips:

- [1] All points will be on one grid line or another.
- [2] The above picture has been provided to be used as a key.
- [3] You can download my custom made **FREE GRAPH PAPER** from my store at <http://tinyurl.com/TPTMMMFGP>
- [4] I have also found that printing graph paper directly from themathworksheetsite.com helps out, but any graph paper will do.
- [5] Remember to copy double-sided when necessary to save paper

Have Fun!

Remember you can find this and many other coordinate graphing activities, including cost-saving bundles at <https://www.teacherspayteachers.com/Store/Mikes-Math-Market>
